The two cards cover different kernel sets, so accuracy & coverage are reported per card
4 kernels: fit 24 GiB, OOM on 8 GiB
RTX 5060 (8 GiB): 222 of 235
221 available on both
9
RTX 3090 Ti (24 GiB): 225 of 235
1 kernel: NVFP4 GEMM (Blackwell-only, no Ampere compile)
9 MoE kernels: expert weights OOM > 24 GiB
