What the complete corpus supports

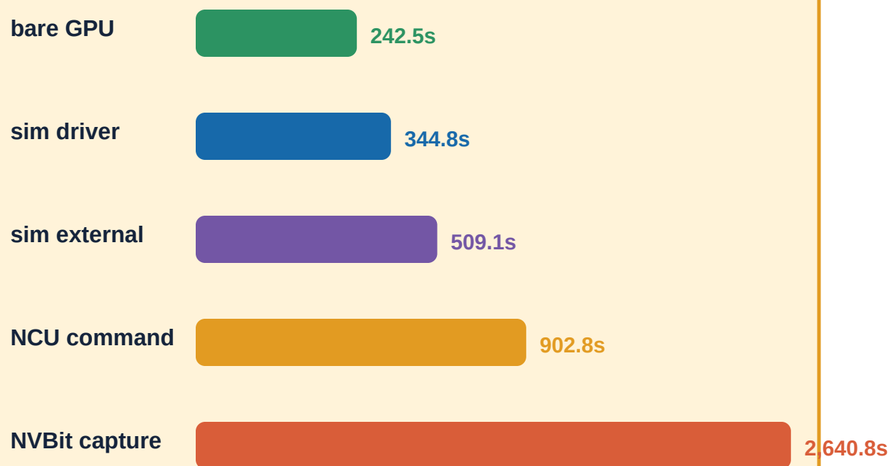
Launch-level MAPE from corrected full-corpus joins; the right panel keeps campaign boundaries honest.

A ARCHITECTURAL METRICS

mean absolute percentage error (lower is better)

B CAMPAIGN COST

seconds; boundaries are not interchangeable



Future work

DRAM reads • aggregate L2 hits

GPC/SM completion frontiers

No same-host Accel-Sim speedup claimed

Caption. The dashboard makes the paper's argument visually testable: several architecture-facing surfaces are below 10–15%, complete-corpus replay is practical, and unresolved families are not hidden behind a pooled score.
